

# AGM

## ABSORBENT GLASS MAT BATTERY

AGM (Absorbent Glass Mat) batteries are designed for Military vehicles with high consuming electrical devices or intensive use.

### KEY FEATURES

- 3x higher cycling resistance
- Longer lifetime in all weather conditions
- High cranking power even when charge is low
- 100% leak and spill proof
- 100% maintenance free
- Made in Germany
- Increased charging acceptance
- Advanced start and stop systems

### AVAILABLE BRANDS

Available upon request

Specific technology and application

### RECOMMENDED FOR

# EFB

## ENHANCED FLOODED BATTERY

EFB batteries are designed for vehicles used in military operations, to optimize the performance of the electrical devices supplied by the battery, as well as driving in challenging conditions.

### KEY FEATURES

- 2x higher cycling resistance
- Longer lifetime
- High cranking power even when charge is low
- 100% maintenance free
- Made in Europe
- Increased charging acceptance
- Regular start and stop systems

### AVAILABLE BRANDS

Available upon request

### RECOMMENDED FOR

# HEAT PROOF

## RESISTANT TO HIGH TEMPERATURES

HEAT PROOF batteries are designed to provide increased longevity and increased resistance to corrosion in hot climates when compared to conventional batteries. These batteries are ideal for military operations in hot climates.

### KEY FEATURES

- +30% lifetime in hot conditions
- Higher resistance to corrosion
- Explosion proof lid
- 100% maintenance free
- Made in Europe
- Low self discharge
- High rechargeability

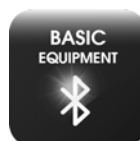

### AVAILABLE BRANDS

Available upon request

### RECOMMENDED FOR

# POWER+

## LONG-LASTING POWER

POWER+ batteries are specifically designed to offer optimal performance in both cold and hot conditions, providing the necessary power to start the engine even in the most extreme climate conditions faced by military personnel.

### KEY FEATURES

- High cold cranking power
- Explosion proof lid
- Long life
- 100% maintenance free
- Made in Europe
- Low self discharge
- High rechargeability

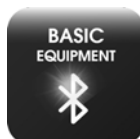

### AVAILABLE BRANDS

Available upon request

### RECOMMENDED FOR

# HEAVY DUTY EFB FORCE EFB BATTERIES

This exclusive technology provides heavy duty military vehicles with the strongest vibration and cycling resistance, allowing them to withstand rigorous use and maintain upmost performance even in demanding combat applications.

## KEY FEATURES

- Very high vibration resistance (vibration  $\geq$  V3EN50342-1)
- 2x higher cycling resistance (water consumption  $\geq$  W3 EN50342-1)
- Increased charge acceptance
- Longer lifetime
- High cranking power even when charge is low
- Made in Europe
- 100% Maintenance free

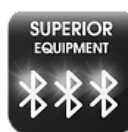

## AVAILABLE BRANDS

Available upon request

## RECOMMENDED FOR

# HEAVY DUTY ESSENTIAL+ LONG-RUNNING TIME

Our heavy-duty conventional batteries provide excellent vibration and cycling resistance, making them ideal for military use. We offer these batteries with Maintenance Free technology as well as non MF (hybrid) options, so you can choose the best option for your needs.

## KEY FEATURES

- High cranking power
- High cycling resistance
- Long lifetime
- Made in Europe
- 100% Maintenance free (hybrid also available)
- Very low auto-discharge
- Explosion proof lid
- Labyrinth lid and flame arrestor
